

# JAMES JONES

---

## Profile

---

I currently am seeking an opportunity as a driver, heavy duty mechanic, machinist, welder, or fabricator. I have experience with block and masonry manufacturing equipment, hydraulics, pneumatics, and welding. I am highly motivated and a technically oriented individual that takes initiative and I am able to work productively unsupervised. I am a team player, safety orientated and always striving to achieve excellence.

---

## Summary of qualifications

---

### EQUIPMENT MAINTENANCE

Ten years' experience in the maintenance and repair of gasoline and diesel powered automotive, heavy and light construction and other power-driven equipment. Ability to accurately troubleshoot, repair and maintain hydraulic pumps, motors, gear boxes and valves, electric motors, panels, plumbing of water systems.

### WELDING & FABRICATION

Knowledgeable with the setup and operation of various welding processes including Hard Facing with metal overlay and wire feed welders. Skilled in machining and fabrication of metals and special alloys to design, maintain, repair and modify vehicles and plant related equipment, and to construct specialized devices, parts and structures.

---
